- **B** Oilify
- **C** Apply Canvas
- **D** Newsprint

Part 3: Fix and improve

28. Where do you find Color Enhance?

- **A** Filters → Color Enhance
- **B** File → Color Enhance
- **C** Tools → Color Enhance
- **D** Colors → Auto → Color Enhance

29. What does Color Enhance do to a dull picture?

- **A** Makes it black and white
- **B** Makes it smaller
- **C** Removes the background
- **D** Makes the colours look more natural and lively

30. Which of these does enhancing colours change?

- **A** File name
- **B** Computer speed
- **C** Brightness
- **D** Paper size

31. Do you have to set sliders for Color Enhance?

- **A** Yes, ten sliders
- **B** No, it works automatically
- **C** Yes, you must type numbers
- **D** Yes, you must draw a box

32. Where do you find Color Balance?

- **A** Colors → Color Balance
- **B** Filters → Color Balance
- **C** Edit → Color Balance
- **D** Select → Color Balance

33. Which three ranges can you change?

- **A** Shadows, Midtones and Highlights
- **B** Top, Middle and Bottom
- **C** Small, Medium and Large
- **D** Red, Pink and Brown

34. Which pair is one of the sliders?

- **A** Black–Pink
- **B** Square–Circle
- **C** Up–Down
- **D** Cyan–Red

35. Why keep Preview ticked?

- **A** To make the file smaller
- **B** To print the picture
- **C** To see the change before you click OK
- **D** To save the picture

36. How do you make a guideline?

- **A** Press the Delete key
- **B** Drag from the ruler onto the picture
- **C** Choose File → Open
- **D** Click the Text tool

37. Which tool turns the picture?

- **A** Clone
- **B** Rotate
- **C** Despeckle
- **D** Newsprint

38. Where is the Rotate tool in the menu?

- **A** Tools → Transform Tools → Rotate
- **B** Filters → Enhance → Rotate
- **C** Colors → Rotate
- **D** File → Rotate

39. What do you line the picture up with?

- **A** The toolbox
- **B** The menu
- **C** The title bar
- **D** The guideline

40. What causes red eye in photos?

- **A** A dirty screen
- **B** Too much sunlight on the ground
- **C** The camera flash reflecting off the eye
- **D** A broken computer

41. Where is the Red Eye Removal tool?

- **A** File → Red Eye
- **B** Colors → Red Eye
- **C** Filters → Enhance → Red Eye Removal
- **D** Select → Red Eye

42. What should you select before using the tool?

- **A** The whole house
- **B** The eyes
- **C** The sky
- **D** The ruler

43. Which slider removes the red?

- **A** Threshold
- **B** Depth
- **C** Mottle
- **D** Exponent

44. What does the Clone tool do?

- **A** Rotates the picture
- **B** Makes it black and white
- **C** Saves the file
- **D** Paints a copy of one part onto another part

45. Which key do you hold to set the source?

- **A** Enter
- **B** Tab
- **C** Caps Lock
- **D** Ctrl

46. Where is the Clone tool?

- **A** Filters → Clone
- **B** Colors → Clone
- **C** Tools → Paint Tools → Clone
- **D** File → Clone

47. Which job is Clone good for?

- **A** Making sound louder
- **B** Removing an unwanted object
- **C** Printing
- **D** Opening files

48. What does Despeckle remove?

- **A** Small dust particles and marks
- **B** The whole background
- **C** Red eyes
- **D** The picture frame

49. Where is Despeckle?

- **A** Filters → Enhance → Despeckle
- **B** File → Despeckle
- **C** Tools → Despeckle
- **D** Image → Despeckle

50. Which radius gives the best result?

- **A** The biggest radius
- **B** No radius at all
- **C** A negative radius
- **D** A small radius

Answer key

Teacher and student copy.

No.	Answer	Lesson	Why
1	**A** GNU Image Manipulation Program	Meet GIMP	GIMP is a free program for editing pictures.
2	**D** File	Meet GIMP	File → Open opens a picture.
3	**C** Filters menu	Meet GIMP	All the effects are in the Filters menu.
4	**B** Draw a freehand border around part of a picture	Free Select tool	You draw your own border around the part you want.
5	**B** Enter	Free Select tool	Enter joins the points into a selection.
6	**A** Ctrl + C	Free Select tool	Ctrl + C is copy and Ctrl + V is paste.
7	**D** The selection becomes more accurate	Free Select tool	More points follow the shape better.
8	**C** Free Select	Intelligent Scissors	Both select shapes by clicking points.
9	**C** The line snaps to the edge of the object	Intelligent Scissors	It uses the colours near your clicks to find the edge.
